My tuned Kreidler Florett RS

(much more fun)

This is the Kreidler I'm proud off. It is not the original model anymore, it's built to be a small 'roadracer', that looks good and sounds good too. It's inspired on the original Kreidler Florett RS of 1973. (This bike was built in 1978) but now fully modified and changed into a RS (model '73) motorcycle!

Model:
RMC-S 1978 (Dutch moped K53/402)

Engine:
air-cooled 2-stroke 1 cylinder 60,2 cc (3.6 ci)

Performance:
12 HP (8.9 kW) at 10,500 RPM
(Test by Dynojet-model 150 Dynamometer)

Topspeed:
119 km/h
(lying with your nose on the gastank!)
